### Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

| Phase of Journey                                                            | Stage 1                                                                                 | Stage 2                                                                  | Stage 3                                                                            |
|-----------------------------------------------------------------------------|-----------------------------------------------------------------------------------------|--------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>Actions</b><br><i>What does the customer do?</i>                         | Applicant enters details (income, credit score, education) on the web form and submits. | Flask backend parses input, scales features, and runs the XGBoost model. | Flask app displays the prediction result (Approved / Rejected) on the submit page. |
| <b>Touchpoint</b><br><i>What part of the service do they interact with?</i> | Web form interface (predict.html)                                                       | Flask routing and XGBoost inference controller                           | Result interface (submit.html)                                                     |
| <b>Customer Thought</b><br><i>What is the customer thinking?</i>            | "Is the form simple to fill? What data is required?"                                    | "Is the algorithm processing my application fairly?"                     | "Wow! I got the approval result instantly."                                        |
| <b>Customer Feeling</b><br><i>What is the customer feeling?</i>             | Cautious, hopeful                                                                       | Anxious, waiting                                                         | Relieved, satisfied                                                                |

|                                                                |                                                   |                                                  |                                                       |
|----------------------------------------------------------------|---------------------------------------------------|--------------------------------------------------|-------------------------------------------------------|
| <b>Process Ownership</b><br><i>Who is in the lead on this?</i> | Frontend Dev                                      | ML Engineer                                      | Backend / DevOps                                      |
| <b>Opportunities</b><br><i>How can we improve this stage?</i>  | Add client-side validation to avoid empty inputs. | Compare multiple models to ensure high accuracy. | Provide feedback on why the application was rejected. |
