Project Name	SMART LENDER
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

Bank credit officers and loan applicants seeking quick approvals.	Limited technical knowledge, varying device capabilities (mobile/desktop).	Manual credit checks (Pros: accurate, Cons: extremely slow, inconsistent).
Manual loan processing is slow, prone to errors, and inconsistent.	Lack of automated prediction models using historical credit history data.	Credit officers manually cross-reference sheets, causing long queues.
High volume of daily applications and customer complaints about delays.	Smart Lender: Flask app with XGBoost to automate creditworthiness prediction.	Web browser, online bank portal.
Before: Anxious, frustrated. After: Relieved, satisfied with instant decisions.		Local bank branches, physical documents.
